

In my work I try to examine changing, developing and growing of mankind and cultures.

Each human being has it's own and individual pattern – formed by education, movement and personal experiences.

New patterns come along, old ones mix with new ones, burst, stay fragmentary or disappear completely.

I want to visualize the evolution of humans. The individual personality as a result of influences like love, power, happiness, conviction, injury, violence and innated characteristics.

- 1954** Born in Vienna, Austria
